## 6 STEPS OF THE SCIENTIFIC METHOD

### Observation

There are tons of things happening around us all the time.  
Focus your attention on something that makes you curious

### Question

What should you like to know about it?  
Why do you want to know it?

### Hypothesis

What do you think is the answer to your question?  
Make a prediction about what you think will happen

### Experiment

Design and perform an experiment to prove your theory  
Make sure you collect data

### Result

Analyze your data. Look at the results of your experiment  
and try to figure out what it all means

### Conclusion

Make conclusion. What did you learn?  
Was your prediction right?
